

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A non-aqueous electrolyte for a cell comprising ~~at least one~~two or more aprotic organic ~~solvent solvents~~ selected from the group consisting of ethylene carbonate, propylene carbonate, diethyl carbonate, dimethyl carbonate, ethyl methyl carbonate and methyl formate, and a support salt, which further includes two or more phosphazene compounds, wherein each aprotic organic solvent has a compound containing phosphorus and/or nitrogen in its molecule and having a difference of a boiling point from that of at least one phosphazene compound the respective aprotic organic solvent of not more than 25°C, and the number of kinds of the phosphazene compounds is equal to or larger than that of the aprotic organic solvents.

2.-5. (canceled).

6. (currently amended): A non-aqueous electrolyte cell comprising a non-aqueous electrolyte as claimed in ~~any one of claims 1-3~~claim 1, a positive electrode and a negative electrode.

7. (currently amended): An electrolyte for a polymer cell comprising two or more~~at least one aprotic organic solvent~~solvents, a polymer and a support salt, which further includes two or more phosphazene compounds, wherein each aprotic organic solvent has a compound containing phosphorus and/or nitrogen in its molecule and having a difference of a boiling point from that of at least one phosphazene compound the respective aprotic organic solvent of not more than 25°C, and the number of kinds of the phosphazene compounds is equal to or larger than that of the aprotic organic solvents.

8.-9. (canceled).

10. (original): An electrolyte for a polymer cell according to claim 7, wherein the aprotic organic solvent is at least one selected from the group consisting of ethylene carbonate, propylene carbonate, diethyl carbonate, dimethyl carbonate, ethyl methyl carbonate and methyl formate.

11. (currently amended): A polymer cell comprising an electrolyte as claimed in any one of claims ~~7-10~~7 or 10, a positive electrode and a negative electrode.
